

Serial No.: 10/725,242

Amendment Dated: March 20, 2006

Reply to Office Action of December 5, 2005

AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph 1 on page 3 with the following amended paragraph:

~~In the inventive solution according to claim 2, According to another aspect,~~ a rotary pulse generator is arranged in the plane of rotation of the swing axle that is coupled to the control device so as to reduce the driving torque of the drive when the signal of the rotary pulse generator reaches a predetermined value. A rotary pulse generator of this type can be accommodated to be protected adjacent to the swing axle and is not restricted or impeded in its function by the harsh operation of the industrial truck.
